

## Chapter 6 Review

Complete each statement.

1. The sum of the angle measures of an octagon is \_\_\_\_\_.
2. Each angle of a regular pentagon measures \_\_\_\_\_?
3. The length of a midsegment of a trapezoid is the \_\_\_\_\_ of the lengths of the bases.
4. The length of a midsegment between two sides of a triangle is \_\_\_\_\_ the length of the third side.
5. The sum of the measures of the angles of a heptagon is \_\_\_\_\_.
6. The measure of one angle in a regular decagon is \_\_\_\_\_.
7. The midsegment of a trapezoid is \_\_\_\_\_ to the two bases.

State whether each statement is always true, sometimes true, or never true.

8. A quadrilateral with two pairs of opposite sides congruent is a parallelogram.
9. A quadrilateral with one pair of opposite sides congruent and one pair parallel is a parallelogram.
10. A rectangle is a rhombus.
11. The midsegment of a trapezoid is longer than each base.
12. Base angles of a trapezoid are congruent.

13. Put a check in the box if the shape always has the given property.

Property	Parallelogram	Rectangle	Rhombus	Square	Kite	Trapezoid
All sides are $\cong$ .						
Both pairs of opp. sides are $\cong$ .						
Both pairs of opp. sides are $\parallel$ .						
Exactly 1 pair of opp. sides $\parallel$ .						
All angles are $\cong$ .						
Exactly 1 pair of opp. angles $\cong$ .						
Diagonals perpendicular.						
Diagonals are $\cong$ .						
Diagonals bisect each other.						

14. How many sides does a regular polygon have if each exterior angle measures  $30^\circ$ ?

15. Find the value of  $x$ .

16. How many sides does a convex polygon have if the sum of all of its angles is  $1980^\circ$ ?

17. The measures of the interior angles of a quadrilateral are  $x^\circ$ ,  $2x^\circ$ ,  $3x^\circ$ ,  $4x^\circ$ . What is the measure of largest interior angle?

18. In the trapezoid, find the values of

$$a = \underline{\hspace{2cm}} \quad y = \underline{\hspace{2cm}}$$

$$x = \underline{\hspace{2cm}} \quad w = \underline{\hspace{2cm}}$$

19. Find the missing values.

$$x = \underline{\hspace{2cm}} \quad a = \underline{\hspace{2cm}}$$

$$b = \underline{\hspace{2cm}} \quad c = \underline{\hspace{2cm}}$$

HOPE is a parallelogram. Find the lengths or angle measures.

20. If  $m\angle 3 = 35^\circ$  and  $m\angle 4 = 40^\circ$ , then  $m\angle 2 =$

21. If  $m\angle HEP = 108^\circ$ , then  $m\angle EPO =$

22. If  $HP = 8$ , then  $SP =$

23. Find the values of

$x = \underline{\hspace{2cm}}$        $y = \underline{\hspace{2cm}}$   
 $z = \underline{\hspace{2cm}}$

24. If the figure below is a kite as shown, find the missing values.

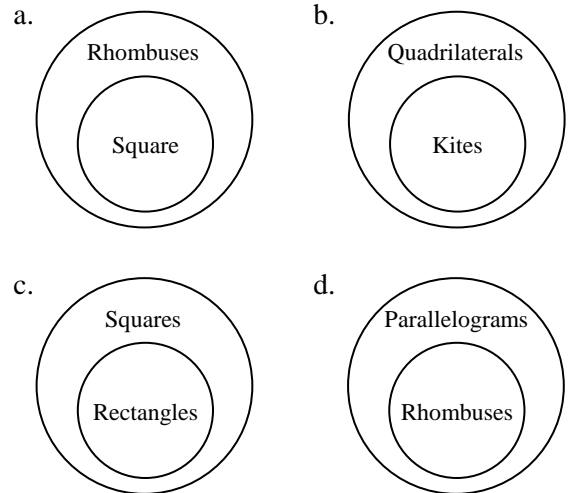

$x = \underline{\hspace{2cm}}$        $y = \underline{\hspace{2cm}}$

25. Is enough information given in the diagram to show that the quadrilateral  $JKLM$  is a square? Explain your reasoning.

26. Which Venn diagram is NOT correct?

27. Name the facts that you know about all parallelograms

- a.
- b.
- c.
- d.
- e.

28. Rhombus diagonals have the following properties which may or may not be true for all parallelograms

- a.
- b.

Use the following diagram for problems #29-31.

$\overline{MN}$  is the midsegment of trapezoid ZOID.

29. If  $ZO=8$  and  $MN=11$ , then  $DI=$ \_\_\_\_\_.

30. If  $ZO=8$ , then  $TN=$ \_\_\_\_\_.

31. If trapezoid ZOID is isosceles and  $m\angle D = 80^\circ$ , then  $m\angle O =$ \_\_\_\_\_.

In problems #32-35, you could prove that quadrilateral SANG is a parallelogram if one more fact, in addition to those stated, were given. State the fact.

32.  $GN = 9$ ;  $NA = 5$ ;  $SA = 9$

33.  $\angle ASG \cong \angle GNA$

34.  $\overline{SZ} \cong \overline{NZ}$

35.  $\overline{SA} \parallel \overline{GN}$ ;  $SA = 17$

36. Find the missing angles.

$a =$  \_\_\_\_\_

$k =$  \_\_\_\_\_

$b =$  \_\_\_\_\_

$m =$  \_\_\_\_\_

$c =$  \_\_\_\_\_

$n =$  \_\_\_\_\_

$d =$  \_\_\_\_\_

$p =$  \_\_\_\_\_

$e =$  \_\_\_\_\_

$q =$  \_\_\_\_\_

$f =$  \_\_\_\_\_

$r =$  \_\_\_\_\_

$g =$  \_\_\_\_\_

$s =$  \_\_\_\_\_

$h =$  \_\_\_\_\_

$t =$  \_\_\_\_\_

$i =$  \_\_\_\_\_

$u =$  \_\_\_\_\_

$j =$  \_\_\_\_\_

$v =$  \_\_\_\_\_

37) Given: Parallelogram PQRS

$$\overline{QR} \cong \overline{QT}$$

Prove:  $\angle S \cong \angle T$

Statement

Reasons

38) Given: Parallelogram AEFC

$$\overline{FD} \cong \overline{BE}$$

Prove:  $\overline{AD} \cong \overline{BC}$

Statement

Reasons

- 39) Given:  $\angle TSW \cong \angle VWU$   
 $\angle STV \cong \angle WVU$

Prove:  $\overline{TS} \parallel \overline{VW}$

Assume temporarily that \_\_\_\_\_.

Then by the Converse of the \_\_\_\_\_,  $\angle TSW$  and  $\angle VWU$  cannot be \_\_\_\_\_.

This contradicts the given information that \_\_\_\_\_.

Therefore,  $\overline{TS} \parallel \overline{VW}$ .

- 40) By making an indirect proof, show that a quadrilateral cannot have all obtuse angles.
