

12.1-12.2

**SPECIAL PAIRS OF
ANGLES**

Naming an Angle

Measurement of Angles

Angles are measured on how open they are.

They're measured by

_____.

70°

Kinds of Angles

WHAT ARE ADJACENT ANGLES?

Adjacent Angles

Not Adjacent Angles

ADJACENT ANGLES

Adjacent angles are angles
_____ to each other and share a
_____ side

1) Define complementary angles

Pairs of complementary angles

$$m\angle 1 + m\angle 2 = 90^\circ$$

$$m\angle 3 + m\angle 4 = 90^\circ$$

Not pairs of complementary angles

$$m\angle 1 + m\angle 2 < 90^\circ$$

Note: Sometimes it's convenient to name angles in a diagram with a number.

2) Define supplementary angles

Pairs of supplementary angles

$$m\angle 1 + m\angle 2 = 180^\circ$$

$$m\angle 3 + m\angle 4 = 180^\circ$$

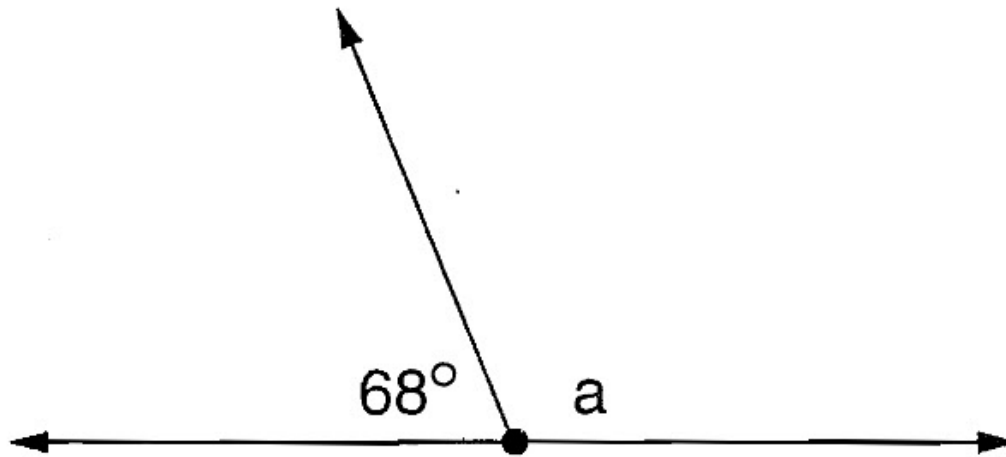

Not pairs of supplementary angles

$$m\angle 1 + m\angle 2 < 180^\circ$$

$$m\angle 4 + m\angle 5 > 180^\circ$$

Find the missing angle.

3) Define vertical angles

Pairs of vertical angles

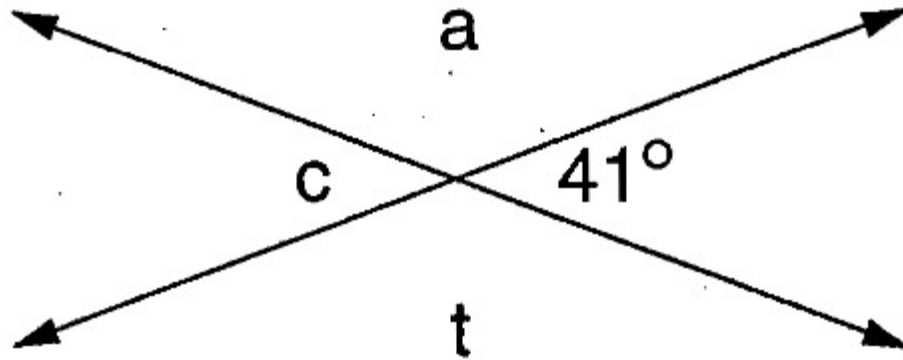

$\angle 1$ and $\angle 2$ are a pair of vertical angles.
 $\angle 3$ and $\angle 4$ are also vertical angles.
 $\angle AED$ and $\angle BEC$ are also vertical angles.

Not pairs of vertical angles

$\angle 1$ and $\angle 2$, $\angle 3$ and $\angle 4$, $\angle 5$ and $\angle 6$, $\angle 7$ and $\angle 8$, and $\angle 9$ and $\angle 10$ are not pairs of vertical angles.

Find the missing angles.

Do you understand?

Name **two pairs** of adjacent angles and **two pairs** of vertical angles in the figure.

Adjacent Angles

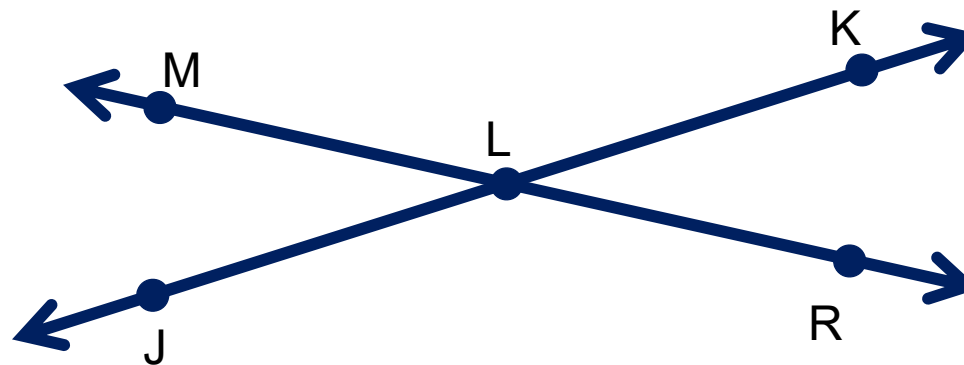

a) _____ & _____

b) _____ & _____

Vertical Angles

a) _____ & _____

b) _____ & _____

Do you understand?

Use the given information to solve each problem.

Angle 1 and 2 are *supplementary*.

$$m\angle 1 = 50^\circ \text{ and } m\angle 2 = 3x^\circ$$

a) Write an equation and find the value of x .

b) Use the value of x to find the measure of angle 2.

Do you understand?

Use the given information to solve each problem.

Angle 1 and 2 are *complementary*.

$$m\angle 1 = x^\circ \text{ and } m\angle 2 = 2x^\circ$$

a) Write an equation and find the value of x .

b) Use the value of x to find the measure of angle 2.
