

# 12.1 & 12.2 – Revisited

Name two pairs of adjacent angles and two pairs of vertical angles in the figure.

Tell whether the angles are *complementary*, *supplementary*, or *neither*.

Tell whether the angles are *complementary*, *supplementary* or *vertical*. Then find the value of  $x$ . Show all algebraic work.

Tell whether the statement is *always*, *sometimes*, or *never* true. Explain.

13) If  $x$  and  $y$  are supplementary angles, then  $y$  is acute.

14) If  $x$  and  $y$  are complementary angles, then  $x$  is obtuse.

15) Angle  $x$  and angle  $y$  are complementary. Angle  $x$  is supplementary to a  $128^\circ$  angle. What are the measures of angle  $x$  and angle  $y$ ?

16) Find all the missing angles.
