

11.2

Adding Integers 1

Essential Question

How are adding integers and subtracting integers related?

Adding Integers Using Color Chips

Adding Integers Using Color Chips

Adding Integers Using Color Chips

Adding Integers Using Color Chips

$$5 + 3 =$$

Adding Integers Using Color Chips

$$-4 + (-6) =$$

Adding Integers Using Color Chips

$$-3 + (-2) =$$

Adding Integers Using Color Chips

Adding Integers Using Color Chips

$$5 + (-3) =$$

Adding Integers Using Color Chips

$$4 + (-7) =$$

Adding Integers Using Color Chips

$$-2 + 8 =$$

Adding Integers Using Color Chips

$$6 + (-6) =$$

Adding Integers Using Color Chips

Using your color chips, solve the following:

$$1) \quad -2 + 6 =$$

$$2) \quad 2 + (-7) =$$

$$3) \quad -3 + (-6) =$$

$$4) \quad -7 + 1 =$$

Adding Integers Using Color Chips

Using your color chips, solve the following:

$$5) \quad -5 + (-9) =$$

$$6) \quad -7 + 11 =$$

$$7) \quad 8 + (-12) =$$

$$8) \quad -10 + 7 =$$
