## 2.7 Dilations

What is a Dilation????

A dilation is a type of transformation that produces a _____ figure by either _____ or _____ the size of the figure.

undilated pupil

dilated pupil

Review: Similarity

$$CORN \sim C'O'R'N'$$

List 3 properties of similar shapes:

- _____
- _____
- _____

Scale Factor

Scale factor is how much we are enlarging or reducing a figure

Original or "Pre-image" of Igor

IGOR

"Image" of Igor

What do you think is the scale factor of the image of Igor?

Scale Factor

Scale factor is how much we are enlarging or reducing a figure

"Image" of Jack

Original or
"Pre-image" of Jack

What do you think is the scale factor of the image of Jack?
Scale Factor

If the scale is <u>greater than 1</u>, we are _____ the figure.

If the scale is <u>less than 1 but greater than 0</u>, we are _____ the figure.

Center of Dilation

- The center of dilation is where we reference how we stretched or shrunk a figure.
- This can be in the middle or outside the original or "pre-image".

Pre-Image

Image

Where is the center of dilation this?

Practice

Tell whether the blue figure is a dilation of the red figure. Explain.

1.

2.

Practice

3) The vertices of a triangle are D (1, 4), E (1, 1), ad F (3, 1). Draw the triangle and its image after a dilation with a scale factor of 2. Identify the type of dilation.

Practice

4) The vertices of a rectangle are J (− 4, 2) K (4, 2), L (4, − 2) and M (− 4, − 2). Draw the rectangle and its image after a dilation with a scale factor of 0.5. Identify the type of dilation.
Practice

5) The vertices of a trapezoid are A(−4, 0), B (−2, 4), C (2, 4), and D (6, 0). Dilate the trapezoid with respect to the origin using a scale factor of 0.5. Then translate it 2 units right and 3 units down. What are the coordinates of the image?
Practice

6) The red figure is similar to the blue figure. Describe a sequence of transformations in which the blue figure is the image of the red figure.
