

# 4.1

## **Graphing Linear Equations (Cont.)**

1) Graph the linear equation using T-chart.

$$y = 2x - 1$$

2) Graph the linear equation using T-chart.

$$y = \frac{1}{4}x - 2$$

3) Graph the linear equation using T-chart.

$$y = \frac{1}{2}x - 3$$

# Graphing Horizontal and Vertical Lines

4)  $y = 4$

# Graphing Horizontal and Vertical Lines

5)  $x = 3$

# Graphing Horizontal and Vertical Lines

6)  $y = -3$

# Graphing Horizontal and Vertical Lines

7)  $x = -5$

8) Solve for  $y$  and then graph the equation.

$$2x + y = -1$$

9) Solve for  $y$  and then graph the equation.

$$9x + 3y = 6$$
