

1.1

SOLVING SIMPLE EQUATIONS (CONT).

Solving with Decimals

Examples

1) $a + 4.7 = 10.3$

Solving with Decimals

Examples

$$2) \ .5 = b - 1.25$$

Solving with Decimals

Examples

$$3) \quad -10 = c + 4.2$$

Solving with Decimals

Examples

$$4) \quad \frac{d}{3} = -2.1$$

Solving with Decimals

Examples

$$5) \quad -.05e = 6.5$$

Solving with Decimals

Examples

$$6) \quad -34 = \frac{f}{-6}$$

Application

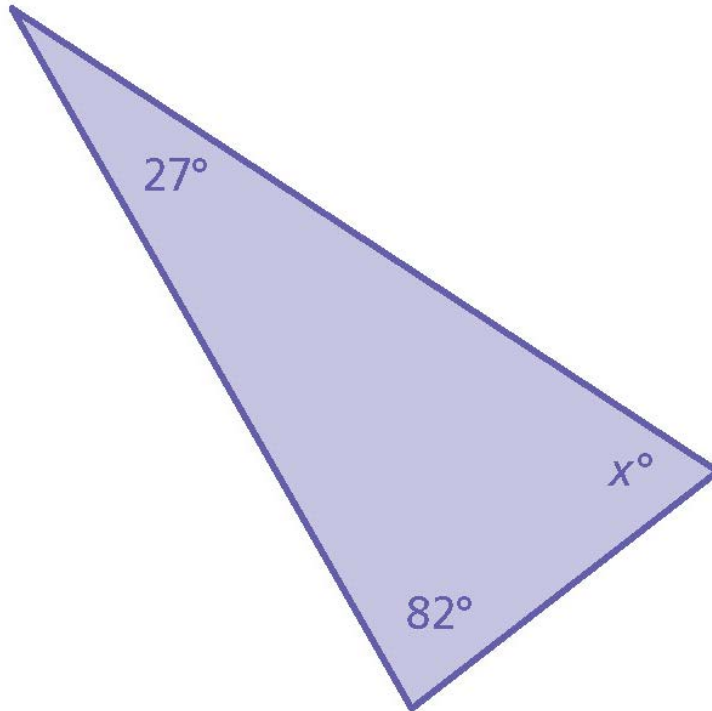

Find the value of the missing variable

$$6) \quad -34 = \frac{f}{-6}$$

Application

Find the value of the missing variable

a.

Application

Find the value of the missing variable

b.
